

1/2 Le Modulator

Le Modulator inspired by the Swiss Architect Le Corbusier's system of interlocking proportion.

Solution

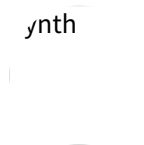

Le Modulator has 2 series, the red and the blue, which is depicted on either side of the handle. The Proportion system is based on the golden section classical ideal which can be found in nature. The system has an infinite range and can start at any number. The markings are set out using the system which can be approximated using the Fibonacci Series.

Revised design removes image in favour of the more abstract markings

2/2 **Le Modulator**

Le Modulator inspired by the Swiss Architect Le Corbusier's system of interlocking proportion.
